ManaPal

Your Magic expert, always in your pocket.

Collection, decks, Commander and games in one app for iPhone, iPad and Mac, with an AI assistant that knows your cards.

Free to use · iPhone · iPad · Mac · 14 languages

✦ AT A GLANCE

Everything a Commander player needs

Today it takes four or five different apps. ManaPal brings it all together and adds an AI expert.

Collection

Scanner, prices, binders, wishlist and trades.

Decks

Import, stats, sample hands and precons.

Commander

Explore commanders and find yours.

Games

Life counter, counters, 3D dice and leaderboards.

AI assistant

Analysis, tailored decks and expert answers.

Free forever: collection, scanner, decks and games.
Pro removes the limits and adds Mana and 6 themes; AI is paid with Mana. No ads.

01 · COLLECTION

Your collection, alive and always up to date

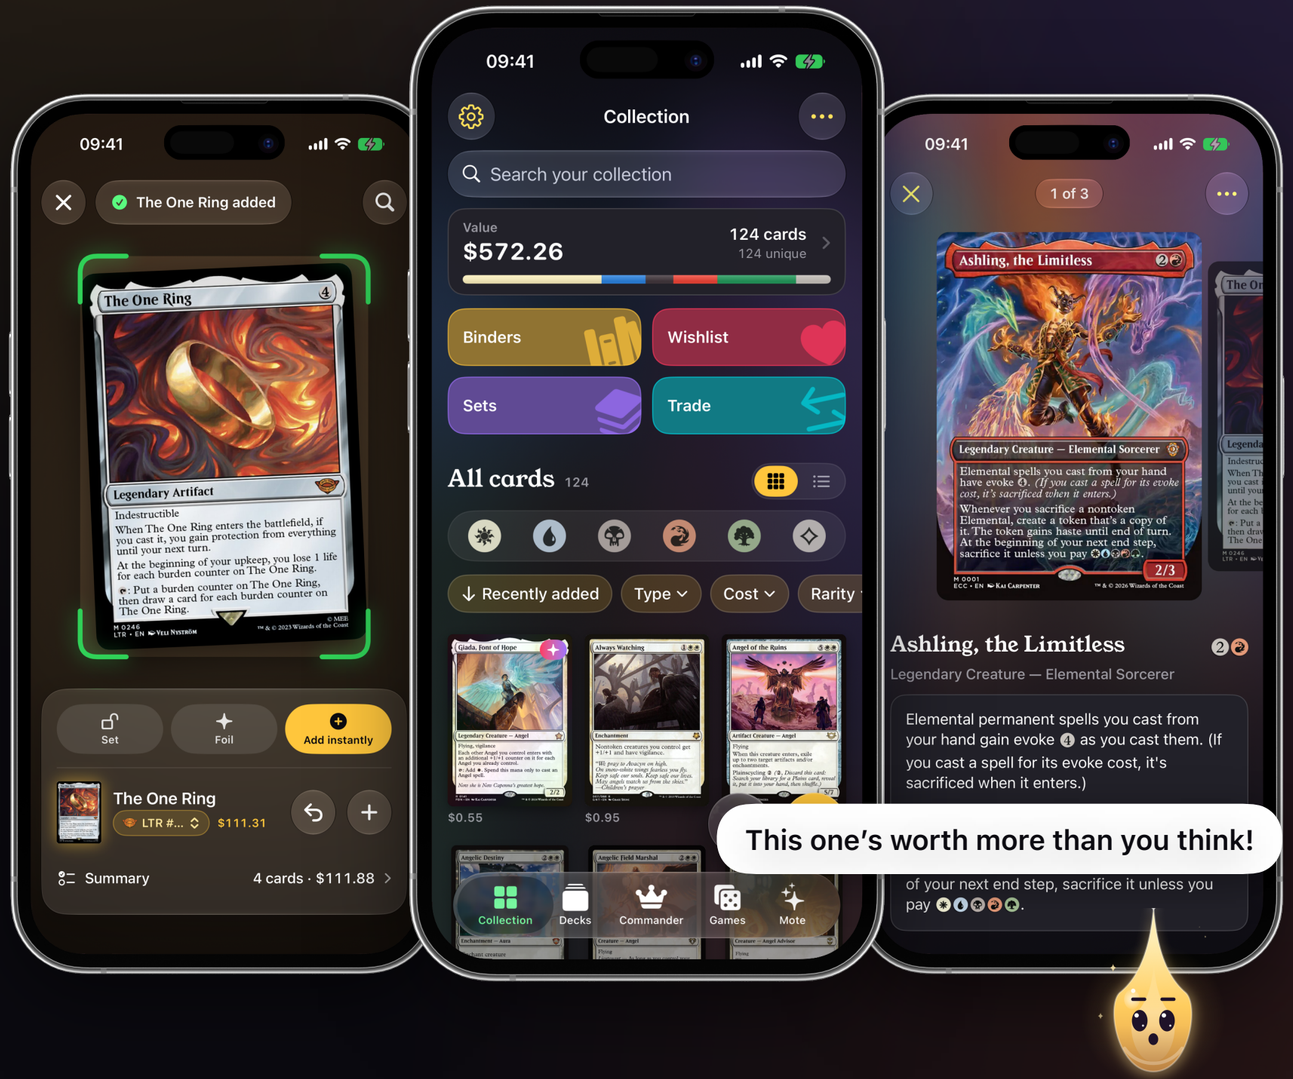
Scan your cards or search by name, set and number: ManaPal recognizes them, foils included, and tells you what they're worth.

Free, unlimited scanner
Recognizes the card from its text and art right on your phone. AI only steps in for the tricky ones.

Always-current value
Daily prices from Cardmarket, TCGplayer and MTGO in several currencies, with a value chart.

Binders, wishlist and trades
Organize your cards, track the ones you're missing and check a trade before you make it.

Import in seconds
From CSV, ManaBox or a text list: no starting from scratch.



02 · DECKS

Clear decklists, with everything you need to play them

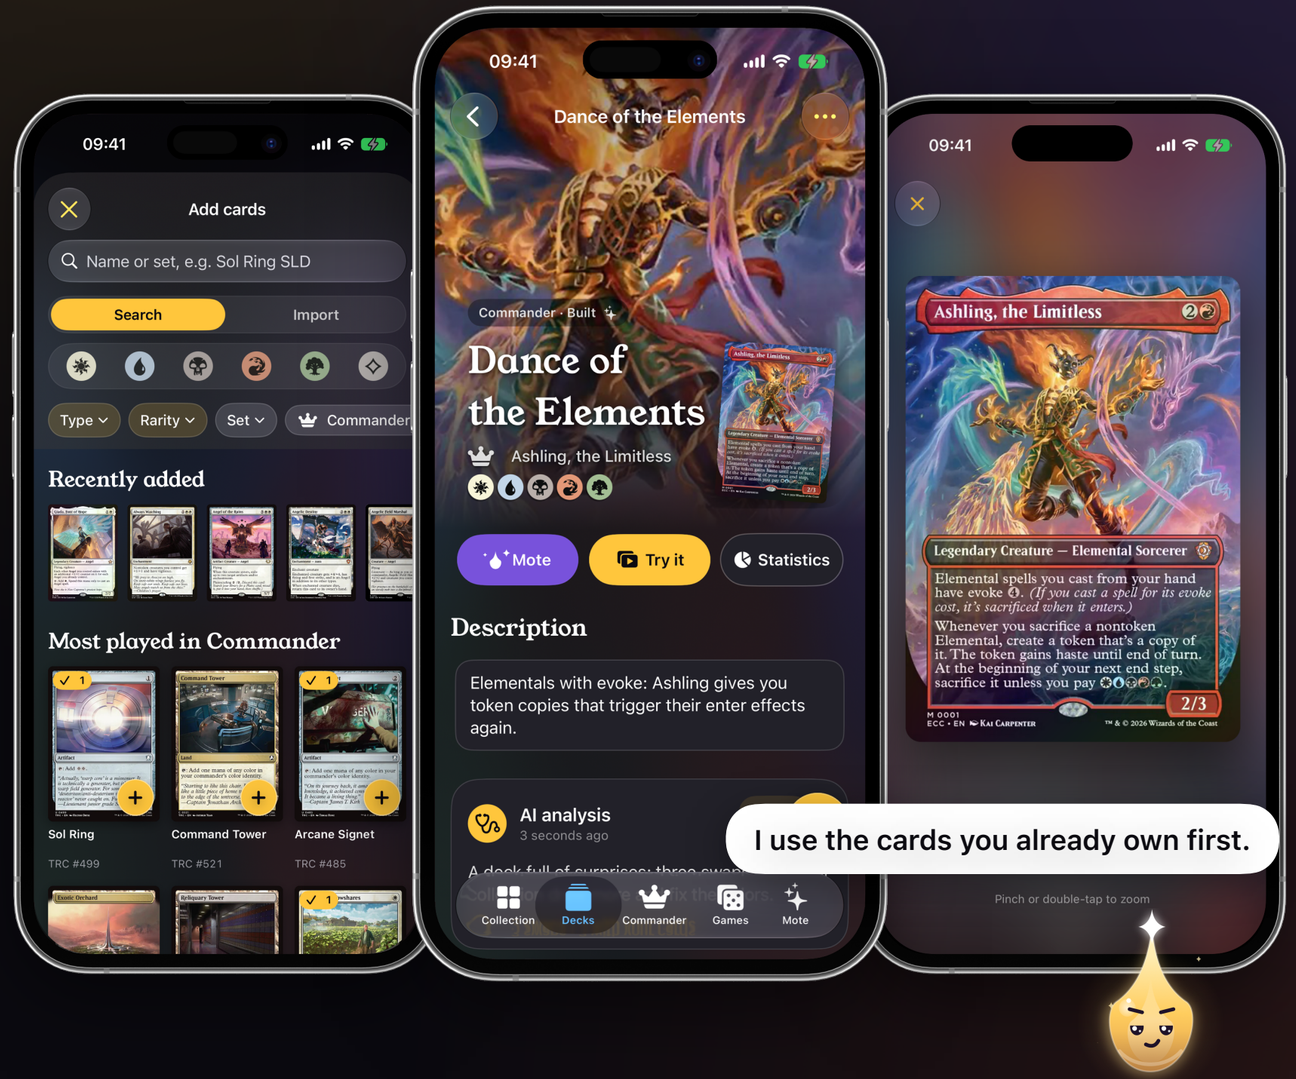
Import or build a deck and instantly see what you own, what's missing and how it plays.

Import from Archidekt or text
Paste an Archidekt link or a list from any site: cards, commander and quantities land in the right place.

List, columns or grid
Mana value columns like TopDecked, collapsible groups, curve and owned cards.

Playtest with drag and drop
Draw an opening hand, then drag cards onto the battlefield: scry, cascade, counters and tokens.

Official precons
A description, "Right for me?" and how many cards you already own, then build it from your collection.



03 · AI ANALYSIS

An honest look at your deck, backed by real data

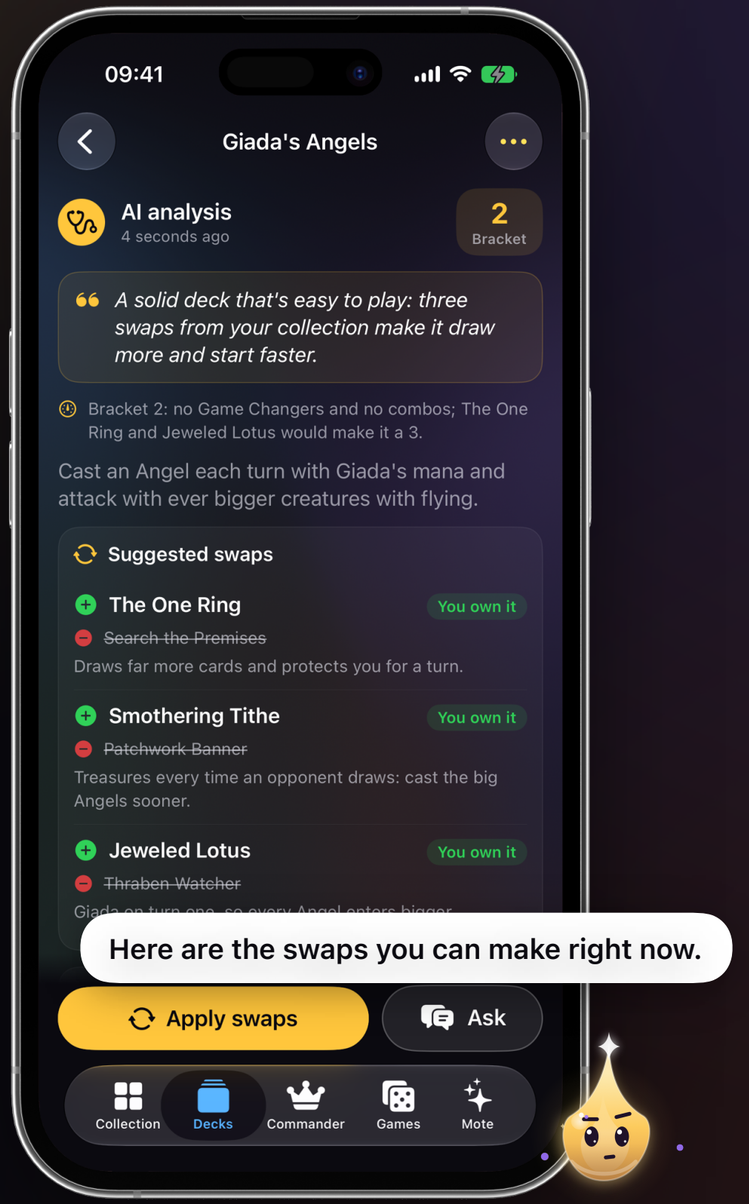
The AI reads the actual card text, Scryfall data and the Game Changers list.

Bracket and verdict
How strong the deck is and what it's missing, in plain words.

What to fix
Every problem comes with its swap: card draw, ramp, removal, curve.

Verified swaps
Cards from your collection first, then the ones to buy: each one checked, applied with one tap.

One-tap tools
Upgrade on a budget, budget version, complete the deck and compare with another.



04 · ASSISTANT

A Magic expert who knows your cards

Mote always starts from something concrete: a deck, a card or your collection.

No blank chat
Pick a deck, a card or your collection and start from the suggested questions.

Real cards, nothing made up
It searches Scryfall and, when needed, the web. Every card it mentions really exists.

It does things, not just answers
It saves decks, updates your wishlist and prepares lists right in the app.

One free question a day
About a card or a deck, without spending Mana.

05 · BUILD WITH MY CARDS

A deck for your commander, from your own cards

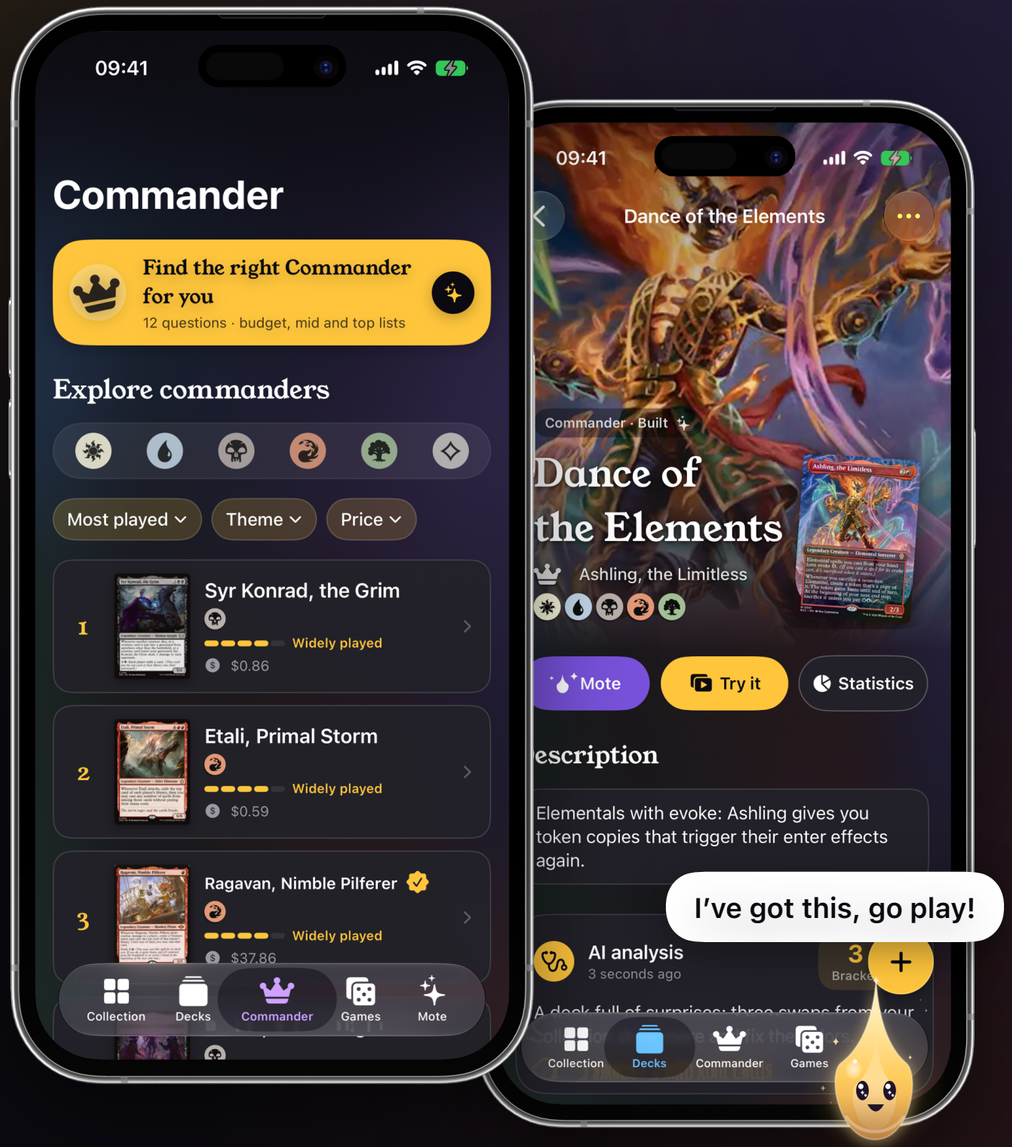
Pick a commander and a style: the AI builds the deck starting from what you own.

Your way
Play style, power level and budget; the deck is checked for lands, ramp and removal.

Your cards first
It uses as much of your collection as it can and tells you what to buy, with prices.

A complete, explained list
100-card Commander or 60-card decks, saved to your To build list with the game plan. It keeps working in the background.

Automatic refund
If something goes wrong, your Mana comes back on its own.



06 · FIND YOUR COMMANDER

The right commander for how you play

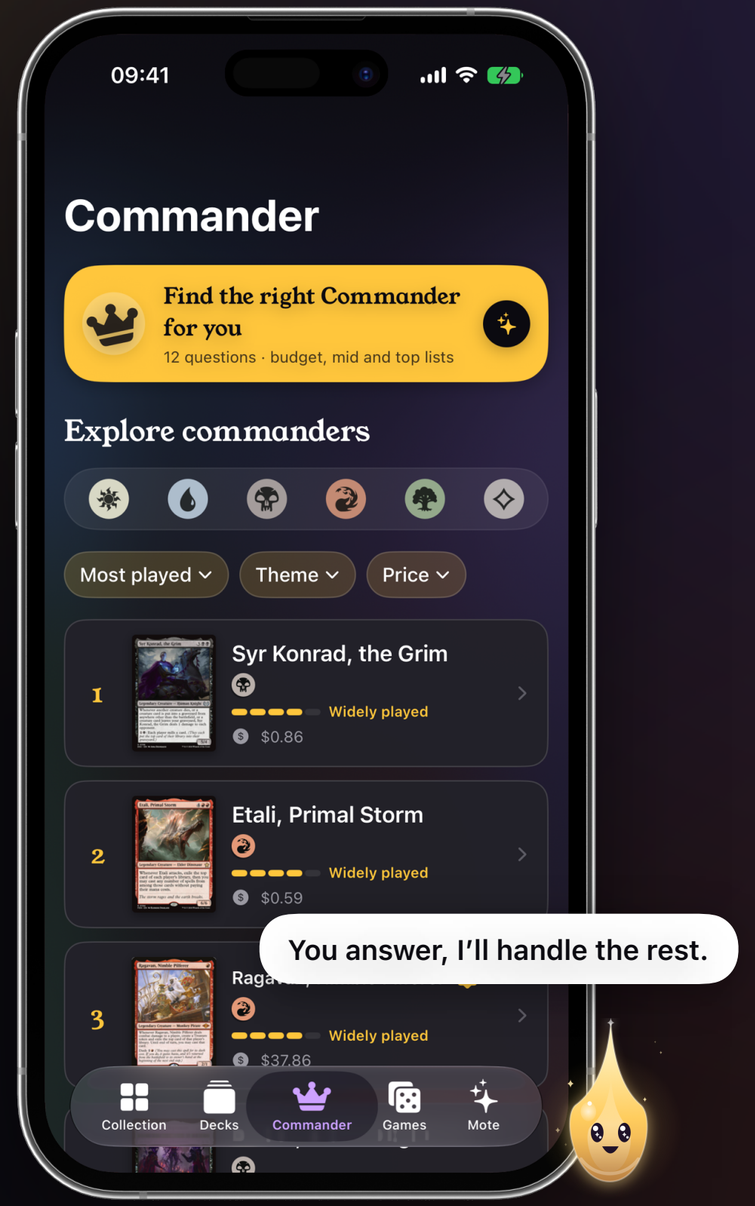
Twelve questions about your style, then the AI matches your answers with your collection and the latest sets.

A 12-question quiz
Pace, interaction, favorite colors, budget: no confusing jargon.

Scryfall data and recent sets
It weighs the cards you already own and the newest releases.

Three tailored picks
Each with the reason behind it, three cost estimates and the deck ready to build in one tap.

Made to share
A result card to send to your playgroup.



07 · GAMES

The game table in your phone

Life counter, counters and dice for Commander nights without pen and paper.

2 to 6 players
Commander, Standard, Brawl, Two-Headed Giant, Planechase and Archenemy, with starting life already set.

Commander damage and counters
Poison, energy, rad, initiative, commander tax, day and night: all one tap away.

3D dice and art backgrounds
Real physics-based rolls, with your commander's art as the background.

Results shared via QR
After the game, friends copy the result with a QR code: the history belongs to the whole group.

08 · STATS

Who really wins in your playgroup

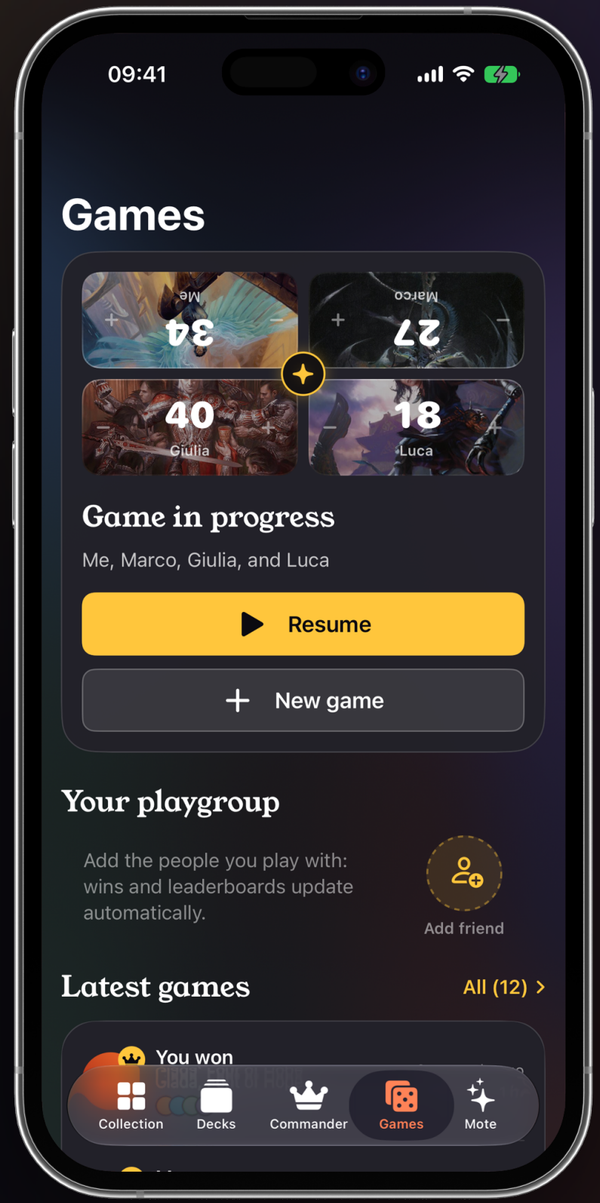
Every game goes into the history: leaderboards, streaks and strongest decks.

Playgroup leaderboards
Wins and games for every friend, plus your group's average game length.

Streaks and records
Win streaks, longest game and month-by-month activity.

Victory screen
A celebration with your commander's art, ready to share.

Advanced stats with Pro
Decks, colors, head-to-heads and your group's commanders in detail.



09 · THE MASCOT

Mote, a living drop of Mana

It welcomes you, explains and celebrates with you. It lights up when you earn Mana, guides your first steps and never tries to sell you anything at the wrong moment.

Welcome

Leave it to me

We've got it!

Deck ready
